

State of Wisconsin  
County of Brown  
Town of Pittsfield

August 23, 2006

A Special on site meeting of the Town Board of Pittsfield was held on Wednesday, August 23, 2006 on Hillside Drive. Meeting was called to order by Chairman Deneys at 6:30 p.m. Present for roll were Supervisor Wagner, Chairman Deneys and contractor, Jason McKeefry. Supervisor Huetter was excused.

On site inspection was done where shouldering had been done by McKeefrys. There was concern because the home owner at 4512 Hillside had filled in the ditch completely and covered a drain tile leaving a six inch outlet. It was felt there is the potential for a problem if the small drain tile is not able to handle a heavy rain fall or freezes during spring thaw causing water to cross the road and possibly freeze. Culverts in this area are planned to be replaced in 2007 when future road repairs are done. Deneys/Wagner, motion to revisit the area in spring to see if any problems arise. Motion carried. A light cap of top soil will be added to the inside edges of the shoulder and seeded to help stabilize the gravel from washing into the ditch.

Meeting adjourned at 7:00 p.m.
